Each person has a smell in which he feels himself, which every time says "this is me" when he feels this and which he adopts as his own. In fact, fragrances change people's lives and worlds and help them discover new worlds in their own. Isn't that true for you too? Isn't there a scent equivalent to every emotion a person experiences in real life? When you felt the happiest, what scent do you remember? Is that a unique smell that comes from your mother, your wife, or the chocolate factory you walk past on your way? What smell stays in your head when you're saddest? So, each fragrance has its own history and its own world.

\*\*

Once there was a lady named Nursel, who lost herself in the sense of smells, turned every smell that she heard from childhood into a feelings and created them again. Fragrances have become a way of life for her, even the life itself. **Nursel**, believed that smells have feelings, believed that each of them contains different worlds, and wanted to declare these feelings not only to herself, but to the entire world. She studied chemistry and became a chemical engineer to make her business more professional and promote her fragrances. She added the knowledge and experience she gained to her senses and created unique and quality fragrances. Then became time to turn the little worlds she discovered into a real world.

Working day and night, she created her own world. Here she presents small worlds where feelings are sheltered to the whole world, as **NUCOS**, which consists of a combination of her name and the word "Cosmetics". With **NUCOS**, she embarked on an endless journey to discover new sensations, every and every day.

L'ATELIER NICHE  
MARTIN LION

# NICHE SERIES

A person who lived in 300 BC, devoted his life to plants, talking to plants and reflecting their essence to his life; Theophrastus...The plants of Theophrastus, which has the first botanical garden in the universe and whose whole world consists of this botanical garden, form the notes of all future perfumes...Now, under the Martin Lion series of this world, witness the essence of plants on your skin, and the scent you have wrapping you with a wind from the past...

"Specialy prepared notes at every point..."

"From the past, come to life in your skin..."

# VIERGE MONTAGNE

A timeless and influencing feeling, lined up  
with notes...

A gentle breeze caressing your skin when you  
are at the closest point to the scorching heat of  
the sun, in a unique, powerful, country garden  
almost at the top of a mountain...

The richness of the fruits that hit your nose  
with that wind, the richness of jasmine and  
violet while it combines with its naivety, it  
ends with the strikingness of amber.
